A Dynamic and Temporal Perspective of Team Resilience

Purpose

- Identify determinants of team resilience in Army tactical teams
- Examine the emergence of team resilience in newly formed and established teams
- Identify evidence-based strategies for how Army can foster team resilience

Schedule

- FY17-19: Data collection with (i) newly formed teams (Initial Employment Trainees), (ii) specialist teams (Special Forces Trainees), and (iii) trained forces (teams in Readying Cycle)
- FY19-21: Data analysis and preparation of final report, and dissemination of findings (to Defence and academic communities)

Product

- Summary of existing theory and research (scoping review)
- Development of a conceptual model to inform team resilience analysis and interventions
- Strategies to foster team resilience to inform Army Commander's Guides

Partners

- Curtin University: Daniel Gucciardi, Kagan Ducker, Nikos Ntoumanis, Cecilie Thogersen-Ntoumani, Sharon Parker, Eleanor Quested
- Macquarie University: Monique Crane
- The University of WA: Peter Peeling
- DST: Philip Temby
